

ELECTRIC VEHICLE ACCELERATOR PARTNER PROGRAM

Advance electric vehicles within your organization

PROGRAM DETAILS

The Electric Vehicle Accelerator Partner program is designed to support Greater Yellowstone organizations in their efforts to (1) electrify their vehicles, (2) to provide opportunities for employees to drive electric, and (3) offer vehicle miles traveled (VMT) reducing commuting options. Electric vehicles can reduce GHG emissions by as much as 90% and have zero tailpipe emissions. If you have sustainability or climate related plans for your organization, this is a great program to help achieve your goals.

We are asking program partners to commit to the following:

1

EMPOWERED LEADER

Entity leader must sign-on to participate as an acceleration partner to formally acknowledge commitment.

4

EVALUATE ELECTRIC

Commit to purchase electric when an electric model is available and can fulfill the use of the vehicle.

2

WORKPLACE CHARGING

Install Level 2 stations for employees or work towards providing charging options during workday for employees.

5

EMPLOYEE SURVEY

Conduct survey (provided by YTCC) of employees about their commuting logistics and electric vehicles.

3

EDUCATE EMPLOYEES

1. Electric vehicle presentation.
2. Offer electric vehicle ride and drive.
3. Provide "Drive less, drive electric" resources for new hires.

6

CHOOSE ADDITIONAL TASK

Choose an additional task to advance electric vehicles or reduce vehicle miles traveled. See next page for additional ideas.

ELECTRIC VEHICLE ACCELERATOR PARTNER PROGRAM COMMITMENT LETTER

We commit to the following:

- 1.) Offer Level 2 charging for employees.
- 2.) Educate Employees*:
 - a. Provide an opportunity for YTCC to present about electric vehicles.
 - b. Offer and electric ride and drive-one day or an ongoing program.
 - c. Provide new employees with "Drive less, drive electric" info during employee orientation. (YTCC to provide materials)

*Must choose at least 2 of the above to accomplish within 12 months of signing on to program.
- 3.) Evaluate Electric:
 - a. Every time a vehicle is up for replacement, assess whether an electric vehicle is available that meets the use of your vehicle, if so, always purchase electric.
- 4.) Conduct employee survey:
 - a. Conduct survey (provided by YTCC) of employees about their commuting logistics and electric vehicle plans.

Survey data will help determine what amount of workplace charging may be needed and inform commuter benefit offerings.
- 5.) Choose at least one more option (option is your choice and particular to the needs of your employees and capacity to offer options)
 - a. Assign an internal electric vehicle ambassador
 - b. Provide publicly available charging stations
 - c. Create new mobility benefits for employees
 - d. Offer incentives for installing charging stations
 - e. Adopt green fleet procurement polices
 - f. Offer incentives to drive electric
 - g. Commit to a full fleet assessment of switching fleet to electric
